The National Executive

If you think that you could spare the time, and wish to be of service to our organisation, then please contact our General Secretary. (Nominations must be received by the 31st January).

Wine, Beer and General Stewards Urgently Required

The Members of the Executive Committee alone could not stage the Annual National Show. They are greatly dependent upon the commitment of the members who volunteer their help to maintain the smooth running of the show as Wine/Beer and General Stewards. It can be very satisfying and beneficial work. It can give an insight into the different aspects concerned with putting on a show.

Wine and Beer Stewards

Wine and Beermakers are invited to steward for the NGWBJ judges at the National. This is an excellent opportunity to study your hobby at close range. It is an essential aspect of training for those aspiring to be Federation or National Judges, and for those who wish to improve their own Wines and Beers. If anyone wishes to study different wines, and improve their own, there is no better way than to volunteer their services as a Wine/Beer steward for one of the Judges (who are likely to be most helpful and informative).

There is an unmarked ISO-wine glass for all wine/beer stewards who advise of their availability by MARCH 1st.

General Stewards

Every year the Committee relies on the help of willing volunteers to act as general stewards during the show weekend. This includes benching the wines and beers and many other general tasks. If you are willing and able to offer your services, **contact Kevin Martin** giving some indication of the approximate period that you feel you may be available.

The Gerry Sparrow Trophy will be awarded to the General Steward who gains the most points in the Show with their wines and/or beers, and has completed at least 4 hours stewarding.

At the Show, please register at the Chief Stewards Table on arrival.

"Competition Guidelines"

APERITIFS: Wines taken before a meal to stimulate the appetite. Aperitifs should have sufficient acid to taste fresh and leave the palate clean. Alcohol should be between 14% and 17%.

TABLE WINE CLASSES: These wines are meant to accompany the enjoyment of food. They can vary from light to strong flavour. Table wines are varied in style and colour and are dealt with under separate headings.

RED TABLE WINE DRY: Colour should be red but tints of purple or black or tawny are acceptable. The wine must be without easily recognizable sweetness. The flavour can be substantial and should remain in the aftertaste. Some astringency from tannins is expected, with mellowness and maturity desirable. The bouquet should be complex and vinous. Acidity should be between 0.45% & 0.65% and alcohol 10% to 14%. For example Bordeaux, Burgundy, Rioja.

WHITE TABLE WINE DRY: Pale colour is desirable, there should be no brown or pink tones. The wine should taste dry without easily recognizable sweetness. The flavour should be pleasant with no bitter aftertaste and should give an impression of freshness leaving the mouth clean. Acidity should be between 0.5% to 0.8% and alcohol between 9% and 13%. The bouquet should be clean fragrant & vinous. For example White Burgundies, Alsace and dry Loire wines.

WHITE TABLE WINE MEDIUM DRY: Pale colour is desirable. The wine must have easily detected sweetness but not sufficiently predominant to classify it as a sweet wine. A good balance and flavour is more important than the exact degree of sweetness. Alcohol should be between 8.5% and 13% and acidity between 0.55% and 0.90%. For example German wines such as Liebfraumilch and QbA and QmP wines.

WHITE TO GOLDEN TABLE WINE SWEET: Colour can be deeper than for the dry or medium wines ranging up to golden but should not be dark. The flavour can be richer than the other wines with the alcohol up to 14%. The acidity should be between 0.6% and 0.9% sufficient to balance the sweetness and to prevent a cloying finish. The sweetness should not overwhelm the other characteristics. This is a wine that is best drunk with fruit or dessert at the end of a meal. An example would be Sauterne.

ROSE TABLE WINE: Commercial examples from the dry Tavel to the medium or medium-sweet Anjou. The wine should be pink, variations in colour intensity and slight orange or 'onion skin' tints are acceptable. The flavour must be light, fruity and fresh and the bouquet should reflect these points. There should not be excessive astringency. The acidity should be between 0.55% and 0.9% and the alcohol between 10% and 12% and the whole should be in balance with any sweetness.

AFTER-DINNER WINE RED SWEET: The colour should be deep. Mature wines may have tawny characteristics but should display some red colour. The flavour should be rich fruity and vinous, the whole being mellow and mature. Acidity should be between 0.45% and 0.7%. The alcohol should be as high as may be achieved by fermentation. The wine should be as sweet as the other characteristics will permit without it becoming cloying. Although this wine is often called 'Dessert' it is meant for drinking after dinner. Examples would be Mavrodaphne of Patras 15% to Port 22%.

AFTER-DINNER WINE WHITE TO BROWN SWEET: Here a wide range of colours is acceptable with the deeper colours usually providing the best wines but there must be no Red colouring. Acidity should be between 0.5% and 0.9%. All other characteristics are as After Dinner Wine Red Sweet. Examples Madeira, Muscat & sweet Oloroso sherries.

FORTIFIED WINES - Madeira Type. Wines in this class should emulate the Malmsey type of wine. This is a fortified, luscious, sweet 'After-Dinner' wine. The colour is deep tawny. The wine is full bodied and has a full sweet flavour with caramelised overtones on the farewell. The sweetness is balanced by a fairly high level of acidity. The final Specific Gravity should be from 1.025 to 1.050, alcohol about 18% and the acidity as tartaric acid about 0.6% to 0.7%.

WINES BY INGREDIENT: These wines can range from light dry table to full bodied sweet after-dinner wines. The main criteria are that the wine should be clean and sound and that it is in balance for the particular class in which it is entered. When judging named ingredient classes one can often detect other ingredients and while these may improve the wine they may blur recognition of the named ingredient. Provided that they do not predominate over the named ingredient the entry is acceptable.

MEAD: Mead is essentially a wine whose character is derived from the use of honey, as the major source of fermentable sugar. Variants with added fruit juice and/or herbs and spices are acceptable. A wide range of colours is acceptable, including red where red fruit juice is added.

“Competition Guidelines Continued”

SPARKLING WINE: This wine must contain carbon dioxide produced by a secondary fermentation in the bottle. Although this wine is usually white, both red and rosé may be entered. Even though the wine may be specified as dry a small amount of recognizable sweetness is acceptable. Acidity may range from 0.6% to 0.9% and alcohol from 10% to 12%. The commercial example is Champagne.

LIQUEURS: Homemade liqueurs are strong (usually 25-40% alcohol), sweet, and highly flavoured after-dinner drinks. Many flavours and styles are encountered but they can be divided into three general groups.

- a) **Fruit base.** Eg. alcohol infusions using various fruits (approx. 25-35% alcohol: 35-40% for orange liqueurs such as Cointreau and Grand Marnier).
- b) **Chocolate/Coffee base.** Eg. Tia Maria, cacao types etc. (approx. 25-30% alcohol).
- c) **Herb/Spice base.** Eg. peppermint, aniseed and more complex blends such as Benedictine types (approx. 30-40% alcohol, with Green Chartreuse an exception at 55%)

BEER DEFINITIONS: All beers entered should be bottle matured and should have a firm and light yeast deposit. The beers should be conditioned to give a fine running bead and close-knit head. Head retention should be good although beers high in alcohol may have little head retention. Acidity should not be predominant in any of these beer types. The definitions used in the NGWBJ handbook are fairly broad. Although they are derived in the main from classic English beer styles, there is no implication that beers have to adhere strictly to the use of English hops. Many brewers now use American or other foreign hops, particularly in their pale ales. Provided that the beer conforms to the NGWBJ guidelines for that style (e.g. it is not excessively hoppy for the style), then the use of non-English hops should neither be penalised nor favoured by judges when assessing beers.

DARK MILD: A lightly hopped beer with an O.G. of 35-42. The colour may range from light to dark brown. The flavour will have a delicate blend of malt and roast grains. Alcohol content will range from 3.5 - 4.5%.

BELGIAN GOLDEN STRONG ALE: O.G. 70-90, alcohol content of 7 – 9%. Yellow to medium gold strong ale with a blend of moderate fruity/spicy/hoppy character; well attenuated without any cloying sweetness. Good white head and excellent bead desirable. Flavour: complex blend of fruity esters, some spiciness, soft malt character, some mellow warming alcohol. Hop bitterness - smooth and complementary, but not dominant.

ENGLISH IPA: Full bodied premium bitter has an O.G. of 50-60 and a rich golden to deep copper colour. The bouquet should be hoppy and grainy. The flavour should be full malty and grainy with a predominant hop and clean bitter farewell. There should be a little residual sweetness to balance the hop. Alcohol 5-6.5%.

WHEAT BEER: Pale straw to dark gold in colour; OG of 45-55. It is typically brewed using up to 50% wheat malt and is often cloudy. It should be highly carbonated with a thick, well retained head. Yeast derived flavours can be fruity and spicy, with phenolic clove and banana. Belgian styles may have a bready/grainy flavor, with coriander and orange peel. Hop bitterness, flavour and aroma should be low, with a soft finish on the palate.

LONDON BROWN ALE: Original gravity of 35-40 giving an alcohol level of 3.5-4%. Colour may vary from light to dark brown. The bouquet is malty backed by caramel. The beer should be sweet on the palate giving a smooth blend of malt and caramel with a low hop flavour.

NEWCASTLE BROWN ALE: The O.G. of 45-50 is reflected in an alcohol level of 4.5-5.0%. The colour should be a light reddish brown and the bouquet a blend of caramel and hop. The flavour should be full-bodied blend of caramelised malt with medium bitterness and noticeable sweetness.

BELGIAN DUBBEL ALE: O.G. 70-80. Alcohol content 7-8%. Dark rich malty strong ale; blend of rich, toasted, caramel, fruity essence, rocky head; well attenuated without any cloying sweetness. Dark amber-brown in colour; good white head and excellent bead is desirable. Flavour: a complex blend of fruity esters, some spiciness, soft malt character; no roasted malt character; some mellow warming alcohol present. Hop bitterness - smooth and complementary. Medium to full body. Warming mouthfeel from alcohol. A dark, rich, malty, moderately strong ale.

DRY STOUT: O.G. of 45-50 and an alcohol content of 4.5 - 5.0%. The bouquet should be that of roasted grain with a flavour of roasted grains full and dry with a long hard bitter finish. The colour is almost black.

“Competition Guidelines Continued”

SWEET STOUT: O.G. of 40-55. Colour is dark brown to almost black. Dark malts dominate the bouquet and flavour, bitterness is slight. Alcohol ranges from 4 to 5.5%. "Milk" stouts, sweetened with lactose have high residual sweetness.

OATMEAL STOUT: OG 45-55. A very dark full bodied, roasty, malty ale with oatmeal flavour. Roasted grain aromas often with coffee like character carry through to the flavour. Low hop aroma. It should have some sweetness but is not as sweet as sweet stouts. An oily mouthfeel from oatmeal is acceptable .

AMERICAN IPA: O.G. 60-70, alcohol 6– 7%. Aroma: range from prominent to intense hop aroma featuring characteristics of American or New World hops. Low to medium clean, grainy-malty aroma may present. Colour: medium gold to light reddish-amber Head retention: medium-sized, white to off-white . Flavour: Hop flavour medium to very high; should reflect American or New World hop character. Malt flavour - low to medium low. Dry to medium-dry finish; low to no residual sweetness. Bitterness and hop flavour may linger into aftertaste but should not be harsh.

PORTER: This beer has an O.G. of 60-70 and an alcohol content of 5.5 - 7%. With a colour of dark brown to black, with a predominance of brown and chocolate malts on the bouquet and in the flavour, the flavour should also be full, with some residual sweetness to balance the hop and roast grains.

BARLEY WINE: Colour ranges from golden to brown. O.G. is from 90 upwards. The bouquet should be rich fruity hoppy alcoholic and vinous. The flavour should be full and malty with a smooth and mature blend of sweetness, hop and alcohol. Alcohol content will be 9% or greater.

BITTER: O.G. should be from 40-50 and the colour from golden to deep copper. The aroma of hops in the bouquet should lead to those of malt and grain. The flavour should be full, malty and grainy with a hoppy bitter farewell and perhaps a little sweetness from residual dextrins. Alcohol content 4-5%.

PALE LAGER: Original gravity (O.G.) should be from 40-50. The beer should be of a light to medium golden colour and the bouquet a delicate blend of hops, malt and DMS (dimethyl sulphide). The flavour should be dry, clean and refreshing, light to medium in malt and hops. Alcohol normally ranges from 4-5.5%.

STRONG LAGER: With an O.G. of 50-65, alcohol content ranges from 5-7%. Colour varies from golden to amber. The bouquet should be malty and grainy with slight DMS and a good hop balance. The beer should be full bodied with a malty flavour, a firm hop background and perceptible alcohol. Some sweetness due to dextrins may be apparent.

Wine and Beer definitions from 2000 NGWBJ Handbook with kind permission.

AMERICAN PALE ALE: OG 1045-1060; alcohol 4.5-6%. Pale refreshing beer, moderate to strong aroma from American or new world hops. Taste should be clean with a light to moderate mouth feel and dry finish. Hop flavour and bitterness can linger on aftertaste but should not be harsh or astringent. Late and/or dry hopping will add to hop flavour. Colour: pale to light gold, large white to off white head, fast running bead.

SAISON: O.G.50-65 and alcohol content of 5.0-7.0%. Often a distinctive pale orange but may be golden or amber in colour. Fruity aroma, reminiscent of citrus with low to moderate hop, and possibly hints of spice. A refreshing, fruity/spicy ale, highly carbonated, with a dry finish, quenching acidity and moderate hop bitterness.

Generally has a well-formed deep tan to dark brown head. Rich, complex aroma & flavour, with variable amounts of roasted grains, maltiness, fruity esters, hops, and alcohol which follow into flavour. Some chocolate, coffee and dried fruit character may be present in moderation. Hop bitterness should balance the complex malt flavours but shouldn't dominate. Aged versions may have a vinous or port-like quality, but shouldn't be sour.

2020. BLACK IPA: O.G. 1050-1070; alc. 5-7%; Colour - very dark brown to black. Colour of head should be tan. Moderate to high hop aroma from Northwest American hop varieties. Malt aroma may be present but is relatively light. Supplies for Club and Federation Competitions

For a few years, we have been supplying many Clubs and Federations around the country with a variety of supplies for their Shows. We know how difficult it can be for Clubs and Federations to get cost effective stationery for their Competitions. Our service is based upon years of development at the National Championship that we organise each year, and the experience of committee members at their own Clubs and Federations; so we know that our solutions can be effective.

We now carry some products in a standard format, for which we have lowered the price, and can supply in smaller quantities. We developed this supplies service as a benefit to NAWB members, but we are quite willing to supply Clubs or Federations who are not NAWB members, or organisations not involved in Wine and Beer making.

Class 77 Members Recipe for 2019 National Show
Will I Amber Ale
Supplied by Martin Thompson

To make 23 litres; O.G. 1048; FG 1011

Ingredients

Pale Malt 4000gms 80% Amber Malt 500gms 10%
Wheat Malt 250gms 5% Crystal 250gms 5%

Hops: to 38 IBU

Willamette 60 mins 45 gms 32 IBU

Willamette 30 mins 15 gms 8 IBU

Irish Moss 20 mins

Willamette *-5 mins 10gms 0 IBU

Mine were 6.6% from Hop and Grape

Method

ABV should be About 4.9%

I used Safale US-05 with American and English Amber Ale in mind. Willamette hops were my choice for the same reason. Willamette were developed from the English Fuggles and retain the earthiness but with more peppery and floral notes. Typical American Amber ales however use the now ubiquitous full-on hops which swamp the toasty malt flavours, in my opinion.

Mash at 66°C for 60 mins

Boil 60 mins and allow temp to drop 5 or 10 degrees below boiling before adding last hop.

Ferment ideally for 14 days if temperature can be constant at 18-19°C.

Carbonate with 4oz sugar.
